

「公開討論会」

It's quite nice
to have an open
debate.
I will use it as
one of 'fascinating
news.'

I heard from Tomogai
of 'Dōjōchō newspaper'
You are going to have
an open debate on
Saturday, TV?

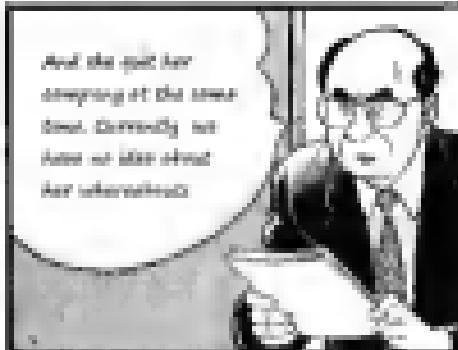

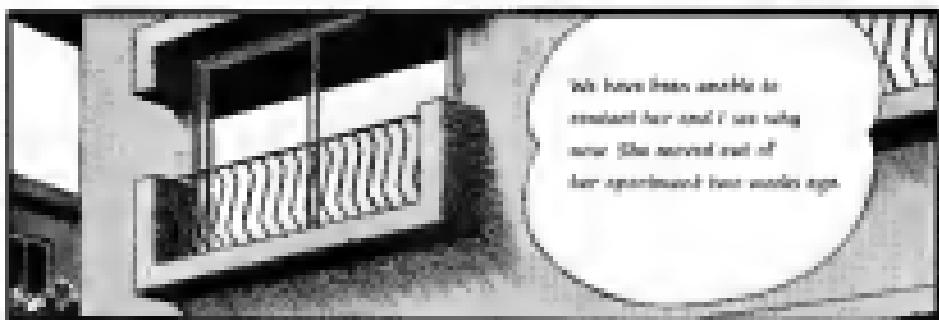

It will likely end up being
a debate between you and
Tomogai since you two are
the only visible candidates
in the area.

Hehehe!
Just as I expected.
Don't mind the
smart. It may well
hurt you.

Don't you know?
The master has a
debate over issue
I understand the words.

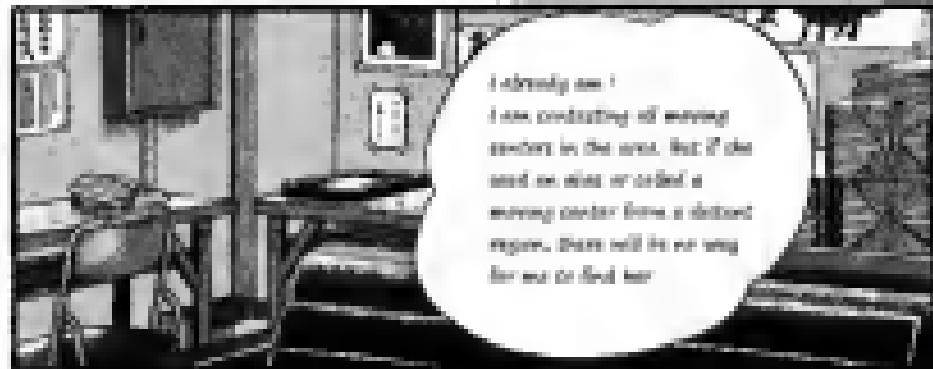

Sir, I am
returning the
key now.

Well, either way...
I have to count on
negotiating from others,
so using the middle or
moderate is the most
optimal way.

Don't be too negative now.

Chinese TV
open debate
because a
half-depict as
if was now
and Chinese
newspaper
spread the
news.

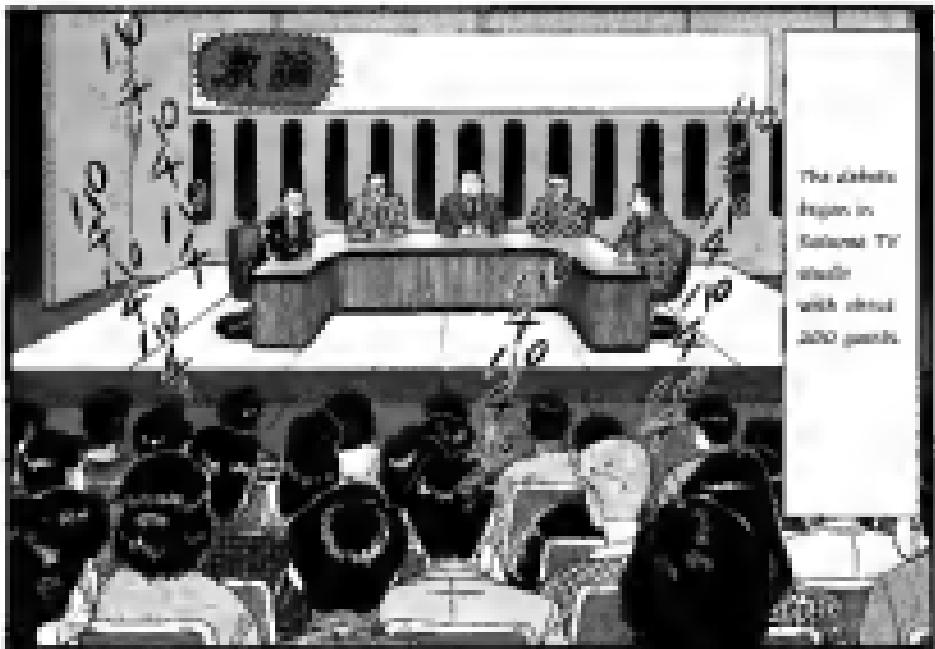

In the face
all candidates
were requested
to be present

However most of
them refused, saying
that they were
busy enough.

In the end, only five
candidates accepted

What I noted that
the rest of candidates
did not have proper
knowledge and education
for an open debate.

The studio dragon in National TV studio with about 2000 guests.

The program was being aired in the golden hour, 7 pm to 10 pm. No break was taking there from also.

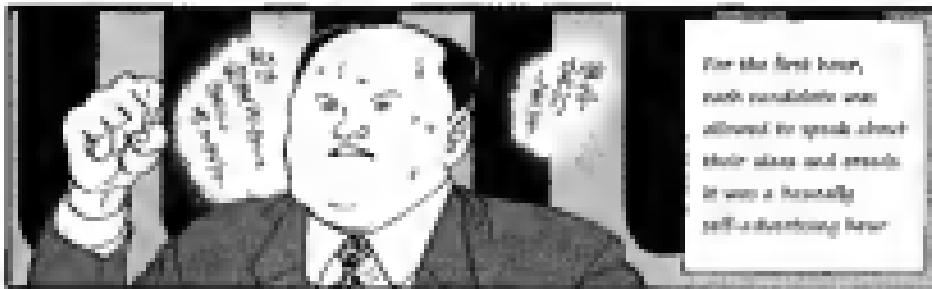

At the very beginning it had already gained 20% viewing rate.

Unfortunately, not all consultants could make it.
But we do know that consultants have lots of bags.

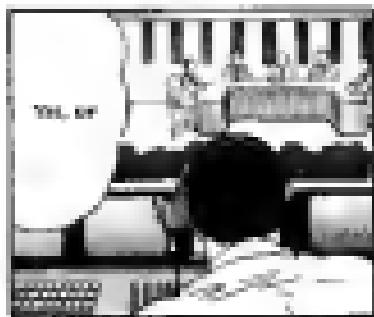

For the first hour, each consultant was allowed to speak about their size and growth. It was a basically self-advertising hour.

It's not
about
size
it's
about
growth.

The other four
hours is the open
debate.
Let them talk
however they want.

Persons Kaji Yosuke and
Tengoku Kengo?
The others are just there to
fill seats?

Their inputs were
regarding FOC (rule 4),
Risks, and outcomes.

From the point the
program focused on
Kaji Yosuke and
Tengoku Kengo.

that you do realize
that you are to
represent your
superior, don't you?

I have a question for you.
You are from Kajibureau
but you don't seem to care
much about your bureaus.

I've stated this repeatedly.
A politician must look at
bigger picture. He must not
work just for his own, even
but for his own nation.

For the Shinkansen
about Shinkansen,
the Shinkansen
refuses,

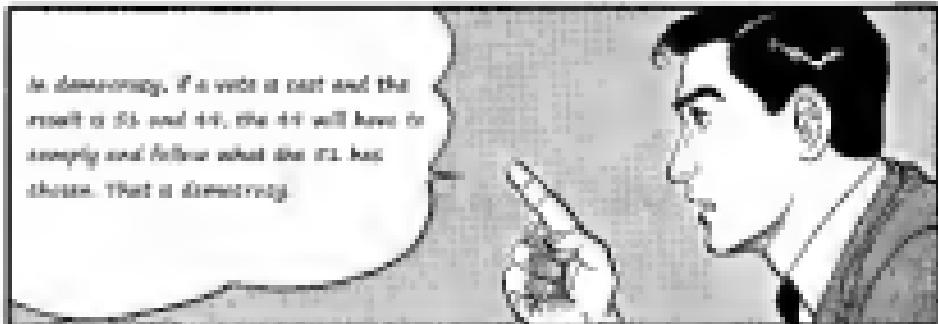

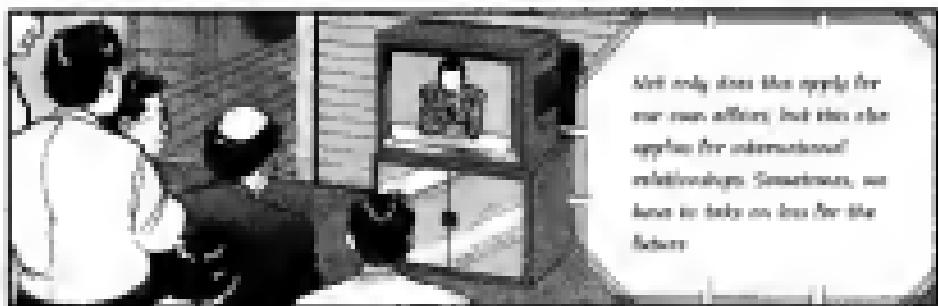

However, of course,
I do represent my own
region.

And as leader to do so...
it should be done by someone
who knows the region.
Throughout, in that case,
it wouldn't take much from
the very region, not have
more influence.
Furthermore, in such a case,
I am representing my own
region.

First of all, one would
have to know people in.
Region you think about
it.
We must find out
that what will be
benefit and
what won't.

However, of bringing in the Shinkansen,
when Kageyama is going to result in
loss for the country, we have to
remember. That is what I am saying.
We can't have everything we want
just because it would be nice to
have it. We have to think about
consequences.

to do it, and
according to your
beautiful theory.

I know, an early re-
election will give
you the answer.

Minister then stated
that Japan had to
open the market
for rice and other
agricultural products.
Now, that would be
unfair for Japan in
international
relationships.

Good !
Keep going !

Those who work for companies
and earn monthly salaries might
favour your side, but for Argentina
and many other places
agricultural products are their main
income. Are you saying that
our farmers have to sacrifice ?

I intended
the decision to
be that !

Another time !

Just because we open our agricultural markets, it doesn't mean Japanese farmers will do. The orange is the prime example. We opened the orange market and Japanese orange has not been defeated. If you think, you will not have to quit what you are doing.

I know you are going to say to Japanese farmers and to all other farmers in Japan.

We have not even opened our agricultural markets and number of our farmers have decreased substantially every year. Now are you going to explain that? Are you going to bring back young men from cities?

Even as we are presenting our agricultural markets, there are going to be less and less farmers in general.

It is only right to sell what we
have plenty and buy what we lack.
Although, in the future, we might
need to worry about maintaining
our own supply of food in case
of the world (the mother world too),
for now, we should open
our markets.

In other words,
our agricultural
productivity is decreasing.
Supply will become less
and demand will become
higher. We have an
option to buy excessive
grain from other
countries for cheap.

By the time the program ended, it reached 24% of viewing rate.
I was told that it was the highest in British TV history.

He then
is only the
beginning

Let's hope that
you will care
about more
than it

Paul? That's good.

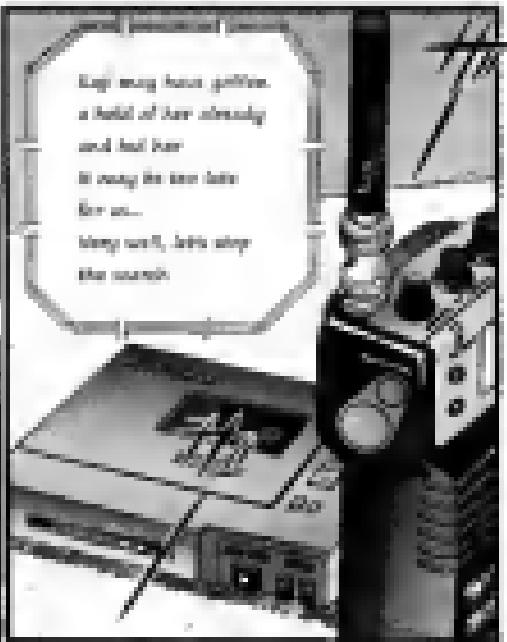

Our staff caught
Tomoko's telephone
signal and recorded
it.

And please
listen to this.

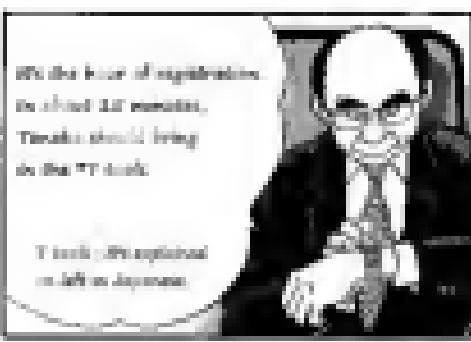

We did ask a private
investigator, but I don't
have lots of hope.

By the way,
did you hear
Kathy performed
on "Tribute"?

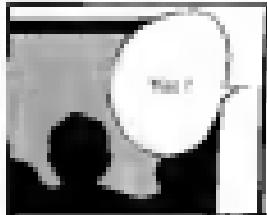

70

TT book will be explained on left on days.

Greetings, my name
is Koji Ryusaku!
